Cell: 082 417 7564

We Specialize Blasting in:

- Sensitive areas such as in between Buildings, underneath power lines, populated areas and next to highways.
- Proximity to structures where shockwave and vibrations can damage adjacent pipelines, house foundations and swimming pools.
- Underwater rock breaking and demolition.
- Environmentally sensitive areas where blast damage and or noise threatens the integrity of the natural environment.
- Underground or fully enclosed blasting where noxious gasses are constraining issues.
